Comments:

From picking-up trash as I commute on foot, with even the smallest bits of plastic-like straws & bottle caps-care-LESS-ly discarded for our ocean's consumption not immune to my awareness. To pieces of anything as large as I'm comfortably able to carry to its proper disposal. Or creating the printed public tutelage hoping readers self-discover their personal contribution to the "waste" creating climate crisis, my "reason for being" is to maintain the civil construction we were "gifted" into at birth.
