Comments:

"Dear Service Forest,

Reject the logging proposed in the Prince of Wales Landscape Level Analysis project in the Tongass National Forest, please.

The Forest Service should not allow the decimation of what little old-growth habitat remains there.

The U.S. Forest Service would be wise to shift its management of Prince of Wales away from controversial costly industrial-scale old-growth timber sales. It would be more profitable to focus on restoration of watersheds, wildlife habitat, tourism, and recreation.

Please protect the Tongass National Forest by transitioning out of old-growth logging there. It will be an even more valuable asset when it's cared for by good stewards.

Regards,

Linda Yow
