Comments:

Many of the streams have underground sewage seeping into them ex.n fork salmon river ,south fork clearwater..as well as many others THESE RIVERS ARE FAR FROM WILD IN THE TRUEST SENSE,SCENIC YES AS THIS IS A SUBJECTIVE DETERMINATION!.Frankly this is another in a long list of land grab policies developed by the environmentalists at the helm of federal agencies !!! Im totally against such involvement in state issues vs the will of the federal government!in the state of alaska, mining is permitted on wild and scenic rivers ,;claims that were placed before the designations are still valid and the mining seasons are not restricted as they are here in the lower 48.....keep this in mind that what one national forest allows sets a precedent in the judicial system as has been upheld in the case ofyou want the answer, look it up, as im not here as your teacher!.....respectfully,dave erlanson sr. swan valley idaho,83449
