Comments:

I am a native of Hawaii. We did not protect our A'ina (land ) as we should have. You have a chance to save the last great roadless areas of our great big beautiful America. Please Do not call the destruction of God's A'ina a "project". It a rape, pillage and plunder. It is a destruction of all that is right and in balance with the earth. These areas are important for watershed, wildlife habitat, endangered species, air and water cleansing, Salmon, human mind ,body and sprit health. What is all that worth? Is there a price on that?

I recently hiked the entire A.T and P.C.T. Areas with dirt fire roads are eroded and . Please leave the forests alone. The slang among hikers is "Forrest Dis-service" because we put our eyes on what you guys really do. Few others are really in a position to know the truth about the condition of our over-grazed, eroded trampled and clear-cut forests. Let road-less areas slow down global warming, renew us and the earth and all the living things on it. Nature will find balance. Science teaches us that . If we do not stop altering the earth, we will be at the top of the endangered species list. Be part of the solution and not the problem.
