Comments:

I object to the intent of this proposed rule!

Fishing and tourism jobs have increased as a share of the region's economy and new timber harvests may imperil those industries. The Walker administration is stuck in the past as it pushes to remove the Tongass from roadless protections. Are we really willing to risk a sustainable future for Southeast Alaska so that the heavily subsidized old-growth timber industry can export more raw timber and local jobs overseas?

The State's Petition is contrary to the best interest of Alaskans and harms the real drivers of Southeast Alaska's economy today - recreation, tourism, guiding, and fishing,

This is just one more excuse for cruelty in the pursuit of GREED that we are seeing in these awful times.

Sincerest Regards,
