Comments:

You should know that I, and many others who treasure America's wild lands, support Senator Maria Cantwell's Roadless Area Conservation Act of 2018.

Logging, road-building and privatization of much of my home state's (Tennessee) forests have resulted in damage to its waterways and impinged on the enjoyment of state parks and areas remaining. We as a country have no desperate need to extract the resources that the few industries involved in this crave, and the permanent damage to a resource that enriches all of us should be permitted to temporarily sate the greed of a few.

Please support Senator Cantwell's actions and her Act. Thank you.
