Comments:

Dear USFS,

I strongly oppose this new measure! It takes us all in the wrong direction away from sustainable jobs and community use of our national forests. This measure would support a few corporate jobs over the daily use of everyone else. We all thought we settled the roadless battles long ago and I find it very upsetting that our government would now go back and try to change this agreement for the benefit of the few corporations profits over the daily sustainable use of the general population. Let's move forward towards keeping our salmon streams in tack, tourism strong, hunting opportunities for all, over more roads that destroy our environment, communities, and Alaskan lifestyles. I do not support more road subsidies to timber, mining or other large mega projects!
