Comments:

i do not want new roads constructed thirrough this national land owned by 328 million americans for the conveneince and moneymaking of ak resident, who can use their own state land to build roads. i find the action of ak residents to be extremely negative and pushy on the environment and if we national citizens dont save it, alaska will just roll over the entire area and pave it making it horrific and environmetnally damaged. we have a unique property in tongass etc and weneed to save andprotect it with all our might. we do not and are not appendags of ak. they are appendage of all of us and our huge population. we own these national lands. they need to be totally saved and protected.i am totally against what the state of ak wants to do to the environmen. they shoot animals from planes, they log with abandon. what a blolt on the environment far too many alaskan residents are. we all own this property. save and protect ebvery inch of it.
