Phone: 9075181622

Comments:

We all did this commenting process and then we together agreed to a roadless rule. KEEP IT! This is about the generations that come after us. As the latest climate report makes clear, we need to radically transform our economies and limit the amount of carbon used by our society. That means, for me, the urgency in protecting the standards that are protecting our own homegrown carbon banks is stronger than ever.
