Comments:

As a forest service employee I am very upset with the level of greed represented here. We need to stop exploiting and extracting from the land. There are many more important values of the Tongass than economic. Leave the old growth forests be. DO NOT open the Tongass for logging or the extraction of any resource on a large scale. We have already destroyed so many old growth forests we must preserve what we have left. They clean our air, provide us water, filter that water, provide us food, provide us medicine, and lastly recreation. Leave them be!
