Comments:

It is critical for the health of the Tongass ecosystem to maintain a low impact and limit road construction. Old growth forest harvest logging roads are not sustainable and can severely impact salmon streams and fish habitat. I love packrafting in the Herbert and Eagle Rivers (TNF 260), and the beautiful landscapes and wildlife there are only possible because of the lack of people, roads, and development. I strongly support keeping the Tongass roadless, for the benefit of our fish, recreation, and livelihood.
