Comments:

I do not believe that Tongass National Forest should be opened up to timber, mining, or other destructive uses. This is one of our few truly untouched wildernesses and must be left alone. Please stop the destruction and ruin of our public lands which you continue to sell off to the highest bidder. These are the people's lands to be preserved for today and future generations and you are responsible for that preservation. Please do not allow this beautiful part of America to be damaged by greed. Thank you for allowing me to comment.
