Comments:

I want the no roads alternative that keeps the roadless rule in effect in all the designated roadless areas. There should be no hydroelectric projects or any other habitat destroying projects in the wilderness and certainly no mechanized access.

The new Alaska Roadless Rule should include all T77 watersheds and TNC/Audubon ecological priority areas that are currently not in inventoried roadless areas. These areas should be protected from old growth harvest and roadbuilding."

"These are great hunting grounds and habitat for Sitka black-tailed deer.

"I love to recreate and enjoy nature in these areas."

"These areas are essential for the fishing and tourism economies in Southeast Alaska and should not be logged or developed."
