Comments:

I am writing to comment on the Chugach Forest Plan Revision #40816.

First of all, the Plan must protect the "wilderness character" of the WSA. This includes classifying all of these lands with the Forest Service's "Primitive" standard, which is the most protective standard in the agency's recreational classification system.

Next, please restore strong protection to the lands within the WSA that the federal government purchased following the 1989 Exxon Valdez oil spill. These lands were acquired for the restoration of wilderness values and must be managed "in perpetuity for conservation and wilderness purposes," as promised when they were purchased.

Please ensure that the plan addresses ongoing illegal recreational use of chainsaws in the WSA, which has resulted in damaging tree removal along dozens of wilderness beaches, including in sensitive areas.

Alternative D recommends the maximum amount of land for Wilderness of any of the Alternatives (97 percent of the WSA, or 1.884 million acres). I strongly support a modified Alternative D wilderness recommendation that also includes Lake Nellie Juan and the lands within the WSA boundary that were purchased for restoration of wilderness resources following the oil spill.

Please produce a plan that protects the Chugach National Forest for perpetuity.

Thank you for your attention.
