Comments:

Please leave the Chugach National Forest alone! I am not in favor of road building, logging, mining, grazing, or any other commercial activity in our national forests.

Our national forests are a national treasure. They belong to the people (as well as wildlife, as forests are their only home). When I say people, I specifically exclude corporations. People are human beings only.

National forests are a safe haven for wildlife and a reservoir of intact ecosystems. National forests are a place for respectful (non-motorized, non-killing, non-destructive) recreation and a place for all Americans to be in the presence of our Creator and his creation.

National forests belong to humans and wildlife, not corporate interests.
