Comments:

I would like to submit in support of option B of the revised motorized plan. I am an anchorage resident and recreate year-round in the mountains including the areas within the confines of the Chugach National Forest. I enjoy both the serenity of the wilderness areas on foot or backcountry skiing, and the opportunity to explore with my mountain bike or snow machine. I think that further limiting winter motorized use will lead to overcrowding in the remaining areas, putting a strain on existing infrastructure and resources. It may also lead to more dangerous riding conditions as more riders compete for prime riding areas and snow, including higher avalanche risk tolerance and collision potential.

Thank you for your time and consideration.
