Comments:

Mountain biking and winter snow biking are very popular recreational activities that currently exist in the Chugach National Forest. Singletrack Advocates is opposed to any proposal that limits the current access for mountain biking or winter snow biking in the Chugach National Forest. Furthermore, we believe that there are specific areas in the Chugach National Forest that would be great for adding more multi-use, soft surface, singletrack trails for hiking and biking, that can link up existing trails to make a world class trail system for everyone to enjoy. Allowing access for mountain biking and winter snow biking allows many folks to lead healthy active lifestyles while enjoying the natural beauty of our great state.

Thank you,

Lee Bolling

Singletrack Advocates - President
