Comments:

To whom it may concern,

I am expressing my concern on the continued closure of our public lands to multi-use. As an outdoorsman and steward of our land living in the west my entire life I believe there is a balance to what needs to be closed off to different forms of recreation. Wildlife and humans can and do coexist and the continued closure of our public lands to those not fortunate enough to be able to walk everywhere need other means of transportation and recreation.

Through education and groups continuing to educate there user base it is possible for all to enjoy the great outdoors. The vast majority of user groups realize that use of public lands is a privilege not a right.

Please allow that privilege to continue.

Mike Mielke
