Comments:

I'm an avid outdoorsman and family man that enjoys taking my family into the backcountry to enjoy the wilderness in many different ways. Some motorized and some not but we should all have access to these areas. The current usage for motorized operation should go unchanged. My family travels all over the west and have been to Alaska before fishing and skiing and plan to come back but won't if we can't go enjoy these areas in a utv or snowmobile. We will take our tourism dollars to other areas. We need to allow for everyone to have access and it can't be controlled by small groups that want everyone to go to private lands.

Thank you for listening.

Regards,

Chad Wallis
