Comments:

Thank you for allowing me to comment. I have spent many hours riding and recreating in the Chugach since 1998. I would like to see more areas opened up to motorized use and less area classified as wildlife sanctuary. It has been proven that even the wildlife can benefit from the trails made by snowmachines. I personally don't like any of the plans put forward due to the lack of access given to the motorized user group. I think that it would be beneficial to all user groups to have corridors opened up through areas for the motorized group to access the backcountry. Thanks again for allowing me to comment and I hope that a plan is chosen that does not completely limit the motorized group access.
