Comments:

To the powers that may be,

My name is Kyle Carver. I am respectfully sending you this message in hopes of expressing my wishes for the Chugach Forest revision to not disclude motorized vehicle use. I have just recently gotten into the sport of snowmobiling / snow biking. The best times I can remember having in the past 8-10 years were stuck in a snowbank and my loyal, patient friends helping me free my sled. I plan on visiting the beautiful state of Alaska next winter and am saving up for a trip with 4 or 5 friends. This was one of our planned destinations to hopefully responsibly see some of the scenery in a safe winter environment. The allowance of motorized winter vehicles allow us and many others to view some sights this beautiful country has to offer. Please take this message with the utmost sincere respect and I will heed the decision that follows. Best wishes.

Kyle
