Comments:

Hello I am a lifelong Alaskan that has been a 3rd generation recreational user of the Chugach area and had been traveling within the chugach while I was in the womb via snowmobile to multiple cabin locations or other areas. My trips and travels have mostly always been into the areas via motorized means because I have asthma and without a motorized access I would not be able to get back into these places where I have been going and enjoying since before I was born. In the same case, my pregnant mother would never have been able to traverse or enjoy the same experiences as in the "wilderness" plans that cancel or ban motorized access. Please consider the values of all of the users and our own ailments or handicaps that would create a completely life changing effect to deny my own as well as many other elders and mobility challenged people. We have rights to access all of the lands just the same. Thank you for your time and considerations.

Cody
