Comments:

I urge the USFS to give special attention in planning to Wilderness Study Parcels within Prince William Sound. These lands should be managed under the Wilderness Study Area prescription and "in perpetuity for conservation and wilderness purposes," as promised following the Exxon spill." I want these wilderness areas to be closed to commercial development or activity such as mining, logging, or the establishment of more permanent recreation infrastructure such as lodges, dock structures, etc.

I would also advocate for the establishment of further non-motorized areas and quiet areas. These areas will be that much more important to preserve with climate changes and an ever growing population.

Thank you for the opportunity to comment on this planning effort and your hard work in this process.

Respectfully,  
Jeremy Robida
