Sage Grouse Plan Amendments

On behalf of Duchesne County, Utah, I hereby express our support for the proposed amendments to the forest plans associated with Greater Sage-grouse. The proposed amendments will enable the USFS to stay on the same page as the BLM when it comes to managing habitat for the species. We encourage the USFS to consider the Utah State alternative to bring USFS management in line with Utah state recommendations.

We have participated in the review of the draft EIS and submitted detailed comments earlier, which have improved the document. We request that the Anthro Mountain area not be included as a PHMA on the forest since it is not an important habitat area in the State plan.
