Comments:

The Salmon-Challis Forrest Service has betrayed Custer County and paid them off to shut up their opinion on the three NEW wilderness designations. This has got to stop. My group is officially against the federal overreach in Lemhi and Custer Counties. We formally request for the building of two more trails open to OHV per year in this new Forrest plan. Our group attracts people from all over the U.S. And we bring in copious amounts of revenue for the Salmon-Challis National Forrest by staying at the campgrounds and we pride ourselves in clearing the trails every spring. We will be against any new wilderness or roadless area. We believe that Fire Suppression has been so and lazy until the fire was too big to handle.

The Forrest Service will not fight a fire on WSA land unless it is in public safety. We believe the Forrest Service is accountable to the air quality and the sediment in the rivers from fire torched land washouts.

The Salmon-Challis National Forrest has not heeded to the public opinion of the locals.

We have come out to meetings for the New efforts for the wild and scenic river additions and have always been a major majority and still have been denied our rights for public input.

We believe any more special designation in the Salmon-Challis National Forrest is against the peoples' wishes and is only supported from outside of the local area.

We also require the Forrest Service to stop closing roads that have R.S. 2477 rights attached and that includes the seasonal closures enforced.

We move to rescind the WSA designation off of the 18-mile Wilderness Study Area. And we move to do the same to the Goldburg WSA which has illegally closed off R.S.2477 Roads recently.
