Comments:

This is a racket that our out of control agencies are engaged in. The truth of the matter is that sea lions and the Chinese are the ones responsible for the salmon numbers. And the fact of the matter is that the population of orcas whose numbers are being used as *evidence* have historically fluctuated greatly in their numbers. We are sick and tired of the land grab, and the ridiculous restrictions that you brownshirted goons have leveled, illegally, against rural residents supposedly to *protect* (but in reality it's to steal) our resources. People want the agencies shut down. If you don't want to get a pink slip in the near future, I suggest you people stop playing games with resources you have no right to seize. Stop blocking access and stealing our resources, and stop using fire to relocate rural residents and to justify huge transfers of money.
