Comments:

Being an Idaho native & my parents also born & raised here, my entire life has been filled with hiking, camping, and loving the quiet and smell of nature. Idaho is truly special and in these times of shrinking wilderness we must look into the future and recognize our forest must be protected. Our fish and other animals are declining. Roads bring vehicles and more potential for fires, pollution, noise, exploiting natural resources, etc. With your power comes great responsibility and we count on you... please protect the Salmon-Challis for generations to come.
