Comments:

From my understanding, this project #49464 will restrict access to forest roads and areas that are currently used in the paragliding and hang gliding community. I believe this sport is already restricted in many ways and this project will further remove access for this sport to continue, thrive, and continue to grow. I hope that this access will not be taken from the paragliding and hang gliding community and remain open to all those that wish to use and partake in the nature beauty of our great land.
