Comments:

King Mountain is a valuable flying site for hang gliders and paragliders. This includes road access to King Mountain launch and the airspace above the surrounding areas, including the Lost River and the Lemhi Range.

King Mountain, a H4/P4 site, is located within the Salmon-Chellis wilderness evaluation area. If the mountain were to be designated as a wilderness area, roads to launch would be closed and launching would be prohibited, likely ending our access to the site.

Please consider our concerns as an international community which serves to bring needed income into the region from many parts of the world and also brings much joy and pleasure to the many who use this place to fly.
