Comments:

King Mountain is a unique and rare Free Flight site. There are precious few legal foot-launch flying sites in the USA. King Mountain is an epic site and one that many pilots in the US aspire to fly from. Any proposed changes to the designation of this site must include allowance for Free Flight activities. Free Flight is consistent with wilderness values: no motors, noise, or moving parts, and there are countless roads into and through wilderness areas on Federal land. These are completely compatible uses. Please preserve Free Flight at King Mountain.
