Comments:

It is understandable to define areas as wilderness area to preserve and safeguard the wildlife and nature but in my opinion, sports like Paragliding and Hang gliding must not be stopped at such places as this sport causes no harm to nature. Instead of banning the sport at the site totally, the rules must be designed to access the site(s). No development or no personal/private vehicles may be allowed but there should be some kind of Eco friendly transportation from the authorities to let people access the site(s).
