Comments:

King mt is indeed a valuable resource. Locking it up as wilderness would be such a disservice to the people that have come to enjoy it from the perspective of free flight. The Hang gliding and paragliding communities are true stewards of their limited launch sites and actually help protect the surrounding lands through their active presence. The members of this community never hesitate to protect the lands, whether the threat is from land abusers or natural (e.g. Wildfires).

Please consider other alternatives besides closing access to the very low impact activities of free flight.

Thank you,
Bill Moody
