Comments:

I'm writing to ask that you please keep King Mountain open to paragliding and hang gliding by allowing the roads and launch areas to remain accessible. King Mountain is a jewel of a site in world of shrinking back country access for those of us that participate in un-powered flight. Compared to almost any other sport access, free flight require minimal impact on the environment, really just road access to the launch site. Please consider maintaining access to this wonderful natural resource, thank you.
