Comments:

There are many ways in The United States through state parks, national parks, national forests, etc. that areas of great natural beauty have been preserved for generations to come. It takes much work and careful management to maintain these areas.,

As a hang glider pilot for over thirty years I have had the opportunity to fly in some amazing places. King Mountain and the surrounding mountains rank at the top and it has been a privilege to fly there. The possible loss of this great flying site is a cause of great concern to the flying community. I hope that an agreement can be reached to allow flying to continue from this site.

Thank You,

Nathaniel Wells
