Comments:

I would recommend that we keep access to King Mountain. I would suggest that efforts on lands be focused on not disturbing soil through tillage, which has created ~40% of the CO₂ from mankind into the atmosphere. We need to be better stewards of the soil organisms and protecting our rich soil instead of letting it wash away and pollute by applying chemicals that are unhealthy for the ecosystem. Please focus on things that are more important to our lands. Thank you, Neal
