Comments:

Please do not shut down road access for hang gliding for the flying site known as "King Mountain"! We pilots are dedicated to leaving little trace of our presence while there. We pick up trash others leave as we do not want to lose access. Our only footprints are near where we launch and land.

For us, places like this are sacred and rare and precious. The incremental impact to the environment of allowing us access is I believe much smaller than the great human joy created. Thank you for reading this.
