Comments:

Your proposed plan will prohibit access to one of the world's premier hang gliding sites. I travel the world flying amazing hang gliding and free flight sites like this and it would be a tragic to lose a site like this (King Mountain). Hang gliding and paragliding are low impact pursuits, but we do need access to launch points and airspace to fly in. The current proposals would prohibit access to and overfly rights for free flyers at King Mountain. Free flyers are passionate about the environment and maintaining access to wild places for the enjoyment of responsible citizens. Please find a way to allow free flying to continue at King Mountain.
