Comments:

Please consider keeping the King Mountain hang glider and paraglider launch open and out of designated wilderness. This is a world class free flight site that encourages and educates others to be good steward of this national treasure. The flying community is thoughtful of the protection of the environment and the flying community has a positive impact on the surrounding town and economy.

If I had not been a pilot that has flown this site, I would never have known about the area and would not be passionate about the protection of this area.

Sincerely,

Dan Hannula
