Comments:

My comments concern the hang gliding and paragliding launch access on King Mountain. I have flown there many times and it is truly incredible. As a community of pilots, we recognize how pristine the area is and focus on minimizing our impact. We are grateful for the opportunity to fly there and losing access would be a tragedy. King Mountain is unlike anywhere else in the world and the Lost River Range is an ideal flying site. It is important to us to preserve and enjoy such a beautiful place. Please do not limit our access, it is very important to our world!
