Comments:

Good morning,

I am writing this statement against the revision plan #49464. I work for businesses that rely on the use of forest lands by ranchers, riders, hikers, hunters and the general public.

We have riders that use the Homestead Motel multiple weeks during the summer creating a great income for all the businesses in Leadore, Idaho.

All of the above use Peterson Metal Products for products though out all of their business. From cattle guards to feeders to parts for the equipment. We have multiple people that stop and get tires fixed to needing oil or just for a little air in their tire.

Hikers that hike the CTD stay in the Homestead Motel, use the Laundromat, and purchase goods other local businesses.

Hunters stay in the Homestead Motel, eat the local cafes, buy gas, and buy groceries as well as stay at other motels in the area.

For this amount of land to be switched to wilderness WILL be a large economic downfall for the City of Leadore and its businesses.

Please consider the ramifications that this will have on our community.
