Comments:

Hi, please accept my comments in support of reopening the entire wilderness study area to winter use by snowmobiles and other over-snow motorsports. We would like access to the entire wilderness study area and all the area we lost when the study area closed this land to our use. Over-snow recreation leaves little to no impact on the land due to the mode of travel being on snow that will melt away in the spring. Furthermore, the impact on wildlife is minimal since most animals have migrated out by the time the snow is deep enough to ride snowmobiles and other over-snow motor vehicles. Thank you for the consideration.
