Comments:

Please consider the American bison or buffalo as a species of conservation concern. I am shocked that our American mammal in the wild is not being protected from hunters. People around the world are trying to protect elephants, rhinos, and other big game species. What about our own buffalo that so many of us are thrilled to see in Yellowstone Park and surrounding areas? Please do what you can to see that they are safe for my grandchild to see.

Sincerely yours,

Kendra Mon
