Comments:

Please recommend the maximum amount of land as designated Wilderness. Alternative D comes the closest to this, but it is still deficient in some aspects.

I have personally visited the Hyalite-Porcupine-Buffalo Horn Wilderness Study Area (HPBH WSA) in the Gallatin Range, for example. It is an outstanding wilderness area, critically important for wildness and wildlife, and a key to the long-term protection of both for the entire Greater Yellowstone Ecosystem. The entirety of this WSA must be recommended for designated Wilderness.
