Comments:

Over the recent decades, we have lost thousands and thousands of miles of roads and trail for motorized use. As the population grows, shutting down more and more areas will only worsen things and make our forests more congested. You should not have to be a world class athlete to be able to enjoy the back country. As studies have shown, OHVs DO NOT harm wildlife as the Sierra Club would leave people to believe. Not only is proposal E the right choice out of what you have proposed, we should be OPENING areas to use, not closing them down.
