Comments:

To all it may concern;

With all due respect, I earnestly doubt this statement:

"The Tongass National Forest is pleased to announce that the POW LLA Project is moving into the "implementation phase"."

The old growth forest and thousands of creatures will die. So the forest is not pleased. Only the men who seek to profit from this desecration are pleased to start implementation. We must be frank in these matters of great importance. No more masking the true intentions. Those who care are apparently powerless to stop this implementation. But in the end nature will deal with us and have the last word. If we were more evolved, we might prolong our stay here as guests.

Please don't censor or redact this message. I urge you to post it. I urge all sentient humans of sound scientific mind to heed what is being done.

Sincerely,  
Dan Thompson
