Comments:

Hello - I'm writing today to encourage your agency to not add wilderness areas to the proposed spaces. The use of snowmobiles and other motorized vehicles is important to local economies with the influx of tourism and monies spent during the winter months in those areas. Families depend on the income in the winter. In addition, snowmobilers and other motorized use individuals have little to no impact on the wilderness in the winter. In fact animals are able to get around better with the tracks created by the snowmobile in the winter. Thank you, and please keep areas open!
