Comments:

I am against the POW LLA project because the plan lacks specificity. All relevant details should be known before the plan is approved. Too many projects (like the Atlantic Coast and Mountain Valley pipelines in Virginia) lack such specificity and the number and magnitude of problems increases with the lack of such information.

Also, I am against the harvesting of old growth timber, especially clear cutting, and the harmful effects its harvest might have on other sustainable resources like hunting, fishing and water. Careful, selective timbering is far preferable to clear cutting.
