Comments:

In the year 2019, when 'climate change' is the most urgent challenge we all face as just one of the living creatures on this planet earth, it is absolutely astounding and inconceivable that such a project as POWLLA proposes could even be considered by ANYONE! It leaves me hopeless.

Too much habitat has already been lost. The Forest Service must drop this old-growth idea of timber sales and focus on stewardship and restoration. There is an obligation to sustain and maintain, not destroy.
