Comments:

To whom it concerns: we all are now facing global extinction and unprecedented climate crisis due to human endeavors. Planting trees worldwide, NOT CUTTING THEM DOWN, is one important way to battle CO2 emissions on our planet. There are over 5 Texas sized gures of plastic in our oceans, SUFFOCATING OXYGEN AND MULTI TON WHALES. Why not re-train your loggers to become plastic harvesters who gather and turn plastic into used materials to build homes and buildings? The ecology of the planet depends on innovative new GREEN SUSTAINABLE IDEAS if we are to survive.

Not to mention the devastating effect cutting down forests has on all wildlife who make their homes there?

Do you all live in some parallel universe? We can no longer ignore the devastating effects we are having on our planet!!
