Comments:

I am very disturbed by this proposal. this is a rash, unethical and blatant attempt to cater to the whims of the deranged Trump administration. this is not going to help the forest at all and the scope of this is unwarranted and will have huge adverse effects on our climate and really is an immoral attempt to destroy the forest that really is owned by the American people. you all should be ashamed. a more limited effort should be done that does not drastically impact wildlife and our forest especially in this time of climate crisis. ask the American people what is right and 75 to 80% of Americans would disagree with this. I am ashamed of your greediness and lack of concern for the health and well being of the American people and this planet.
